

## COMPANY BRIEF: P3 GLOBAL ENERGY COMPANY LIMITED

P3 Global Energy (P3GE for short) is a member of mining-energy-power generation group of companies PK Group. PK Group is a privately held, rapidly growing global mining-energy-power generation group of companies with businesses in seven countries across three continents.

PK Group has successfully acquired mining rights for coals, uranium, potash, and other precious metals in several countries in Asia and Africa. To-date, PK Group has been mining high grade coals and other minerals in several countries including Laos, Indonesia, Myanmar, and Madagascar. PK Group is fast-tracking developments of other mines under licensing to the Group as well.

In parallel, PK Group has been investing in power generation business and now owns several licenses to build, own, and operate several large gas-fired and coal-fired power plants and hydro-electric dams in Thailand, Cambodia, Laos, Myanmar, and Indonesia.

PK Group also holds majority interest in Thailand-based Southeast Asia's largest publicly listed construction conglomerate Italian-Thai Development Public Company Limited (ITD) with extensive experiences in mega-infrastructure projects construction including large international airports, large deep sea ports, industrial estates, high-rise building complexes, underground and above ground mass rapid transit systems, long-span suspension bridges, hydro-electric dams, elevated expressways, and onshore small and large diameter oil and gas transmission lines.

Additionally, PK Group holds majority participating interest jointly with Nippon Steel Corporation (NSC) of Japan in two offshore platform fabrication yards located in Thailand. This has provided PK Group with capabilities to build reasonably priced wellhead platforms, processing topside, and steel jackets. Through our affiliation with NSC, PK Group also has access to large diameter offshore pipe laying capabilities.

PK Group entered into energy business with the formation of P3 Global Energy Company Limited in 2008.

P3GE is staffed with experienced personnel from major international and national oil companies as well as major international service companies. P3GE intends to fully leverage PK Group's varied capabilities to become a relevant player in both conventional E & P sector as well as other energy sectors.

Since its formation, P3GE has been actively involved in four main energy business sectors, namely:

### 1. CONVENTIONAL EXPLORATION AND PRODUCTION (E & P)

In 2008, P3GE acquired 100% working interest in an onshore concession in the northeastern region of Thailand as well as working interest in an Additionally, P3GE is actively pursuing other E & P opportunities in Thailand, Indonesia, Myanmar, Laos, Cambodia, Malaysia, India, Bangladesh, Madagascar, Sudan, Mozambique, etc.

### 2. LIQUEFIED NATURAL GAS (LNG)

P3GE has successfully forged technical partnership with a major technology owner of floating LNG technology and several major LNG buyers in Asia. P3GE, thru its subsidiary LNG FPSO Development Company, has been playing the leading role on behalf of the partnership to actively promoting applications of LNG FPSO to monetize offshore stranded gas reserves in Asia-Pacific region. Presently, P3GE are in discussions with several stranded gas field owners.

In addition, P3GE has been in discussion with several leading regional and international companies having know-how and equipment manufacturing capabilities to promote the use of LNG in industrial and power-generation, residential, and transport sectors in Thailand and neighboring countries.

### 3. GAS TRANSMISSION AND DISTRIBUTION

P3GE intends to fully leverage its PK Group's extensive capabilities in offshore and onshore pipeline constructions to provide pipeline investment alternatives. P3GE can provide full service pipeline solutions such as build-operate-transfer with our own PK Group's capabilities and access to capital.

### 4. NON-CONVENTIONAL TECHNOLOGY APPLICATIONS

With access to extensive coal reserves, P3GE is actively engaging in discussions with coal-to-gas and coal-to-liquid technology owners to identify niche commercial applications where our mines are located.

As a member of a rapidly growing global mining-energy-power generation group of companies, P3GE is in good standing to capitalize on the large degree of synergy within our Group to ensure timely and cost-effective implementation of our business plans.
